Main features

- Because it generates little vibration or noise compared to standard hydraulic breakers, its the ideal demolition attachment for parking lots, driveways and sidewalks.
- The Bobcat drop hammer efficiently demolishes concrete and asphalt up to 45 cm thick.
- The fast cycle, 20 blows per minute, allows the operator three second to reposition and reset the loader between cycles.
- The standard Bob-Tach™ mounting system makes easy work of attaching and detaching the drop hammer and loader.
- When not in use, the hammer stands upright. A cushioned safety valve permits the weight to fall slowly if hydraulic flow to the attachment is shut off or lost during mid-stroke.

Applications

- Construction and Demolition
- Road work, Recycling and Cleaning
